## EMPLOYMENT HISTORY

### Atlassian Automation Engineer at Rutube, Moscow

April 2024 — Present

- Collaborated with cross-function teams
- Implemented complex configurations through custom scripts written in Groovy and JavaScript, including REST endpoints development
- Enhanced functionality through integrations with other services via REST API, such as Telegram
- Managed installation and updates of Jira instances on VMs

Stack: MyGroovy (Groovy) JsIncluder (jQuery) Assets (Insight) Atlassian UI (AUI) Jira Jira Service Management Confluence

### Atlassian Engineer at Luxoft Serbia, Remote

April 2023 — December 2023

- Managed Service Desk requests related to Jira, Confluence, Bitbucket, Jenkins, Artifactory, including complex configurations via ScriptRunner
- Assisted with project migrations, access management, and provided consultations on Atlassian stack usage
- Regularly monitored system performance and addressed incidents while on duty
- Collaborated with other engineers, developers, configuration engineers, and product owners
